Samy Ismail

RAN Optimization A. Manager at Vodafone Egypt
Cairo, Egypt

Summary

I am a Telecoms expert with more than 17 years of Radio experience. I have gone through different roles in RF planning and Optimization. I am working on 2G/3G/4G Technologies in Ericsson and Huawei Networks. I manage people since 2004. I managed cross functional projects and contributed to a number of activities and international assignments with different Op-Cos and vendors.

Experience

Vodafone

25 years 3 months

RAN Optimization A. Manager

June 2016 - Present (9 years 11 months)

Egypt

Managing Radio Optimization team responsible for Network Performance on all technologies; 2G/3G/4G/5G

Extra Activities

2004 - 2017 (13 years)

Cairo Governorate, Egypt

2018

Joining Maximize Program; Talent & Leadership Development program that invests in top talents aiming to prepare them for expanded responsibilities.

This was based on three main modules: - Leadership & effective people management - Business Acumen & Strategic Thinking - Applied Learning & Networking through shadowing Leadership Team member from other business areas

2011

Participating in Vodafone Group workshop in Dusseldorf, Germany for evaluating and selecting Geo-location tool suppliers

2006

On-job training for one month in Lisbon, Vodafone Portugal as a part of 3G launch preparation for Vodafone Egypt

2005

Shared in Vodafone YLI (Youth Leadership Initiative) program that aims to develop college students on both Technical and Soft skills. Conducted Technical sessions for GSM system features, and facilitated soft skills sessions for Presentation skills and Change Management.

Nov 2004

Organizing Vodafone-Ericsson TEMS user group meetings in Cairo

Apr 2004

Attending Vodafone-Ericsson TEMS user group meetings in Lisbon, Portugal

RAN Optimization Expert - Senior Supervisor

January 2011 - May 2016 (5 years 5 months)

Managing Radio Optimization team responsible for GE-RAN, UTRAN, and E-UTRAN in Vodafone Egypt Network which has two main vendors; Ericsson and Huawei. My current role includes the following responsibilities:

- # Handling people management issues, coaching, identifying key strengths, and providing development for team members, supporting to solve conflicts, and conducting performance appraisals.

- # Achieve target Radio KPIs for 2G, 3G, and 4G networks.

- # Ensure proper capacity dimensioning and needed expansion actions for absorbing increasing traffic for both voice and data.

- # Monitoring statistics and optimizing performance through parameter tuning and different radio features for all technologies; 2G, 3G, and 4G.

- # Performing consistency checks on network nodes and rectifying problems.

- # Working on improving network status in regular benchmark reports.

- # Conducting trials on parameters and features for all technologies.

- # Conducting regular review meeting with vendors and other Group Op-Cos to share best practices and new features as well as Hardware roadmaps.

- # Perform system audits to ensure proper parameter settings.

- # Performing Network dimensioning for handling special events.

RAN Senior Supervisor (Planning & Optimization)

January 2006 - January 2011 (5 years 1 month)

Cairo Governorate, Egypt

Supervising a team of Radio engineers responsible for the following:

- # Integrating new sites by creating Data Transcripts, Neighbor cell definitions, conducting and analyzing drive tests, detecting problems, installation faults, hardware, interference, and solving detected problems.
- # Monitoring statistics and optimizing performance by tuning parameters and using different radio features.
- # Conducting Intensive drive test surveys in major cities and roads for detecting bad coverage or quality spots, benchmark performance against competitor and tackling weak spots.
- # Performing Network dimensioning for handling special events.
- # Designing, integrating, tuning and optimizing 3G Radio Access Network.
- # Radio department SPOC with commercial team for promos, to analyze all potential promos before launching in order to ensure availability of needed network capacity.
- # Handling Coverage stream for all Network. Interfacing Commercial team for understanding and prioritizing their needs and converting to technical plan for implementation teams.

Radio Systems Engineer

February 2001 - December 2005 (4 years 11 months)

Cairo Governorate, Egypt

Working on Integrating, testing, and optimizing Vodafone Egypt Radio Network by:

- # Creating Data Transcripts for new sites and expansions.
- # Checking site performance through conducting and analyzing field measurements.
- # Optimizing Radio Network performance through analyzing network statistics and working on different OSS tools.

Education

Cairo University

Bachelor, Communications Engineering · (1995 - 2000)
