Ahmed Elemam

Senior Staff Software Engineer
Berlin, Berlin, Germany

Summary

Software Engineering Lead with hands-on experience in Backend and Data Engineering, specializing in Microservices based applications and distributed systems for medium and large-scale projects since 2011.

- Expertise in optimizing performance through advanced techniques, and comprehensive performance monitoring and profiling.
- Identify, design, and implement internal process improvements: automating manual processes, optimizing data delivery.
- Work with data and analytics teams to strive for greater functionality in data systems

Experience

DataRobot
Staff Software Engineer
October 2025 - Present (7 months)
Berlin, Germany

Predictive AI

eBay
Senior Staff Software Engineer
April 2025 - September 2025 (6 months)
Berlin, Germany

Working with the Core Protection team (Reverse Money Movement) for Refund and Returns.

DataRobot
Staff Software Engineer
January 2025 - March 2025 (3 months)
Berlin, Germany

Predictive AI Team (Core Modeling)

Sopra Banking Software

3 years 4 months

Lead Backend Engineer

October 2022 - July 2024 (1 year 10 months)

Berlin, Germany

- Leading payments backend module in micro-services architecture; overseeing migration from monolith to micro-services.
- Enhancing team performance and productivity through proactive ideas for internal development process improvements.
- Acting as a bridge between technical and non-technical stakeholders for effective communication.
- Driving an engineering culture centered around good development principles and quality standards.
- Actively involved in the ongoing development of new features and bug fixing initiatives.

Senior Software Engineer - Backend

April 2021 - September 2022 (1 year 6 months)

Berlin, Germany

- Created, maintained, debugged, and tested software to enhance Payments module and related modules and services.
- Building, and designing Scalable APIs according to business needs for the Payments team.
- Worked on migration from monolith to micro-services architecture.
- Reviewed and improved continuous integration and deployment processes.
- Shaped and applied software standards, emphasizing clean code and proven optimization techniques.
- Contributed to defining requirements, creating software designs, and translating them into code.

VAHA

Senior Backend Software Engineer

July 2019 - March 2021 (1 year 9 months)

Berlin, Germany

- Collaborated with the Backend team to design and enhance the architecture.
- Conducted technology research and engineered comprehensive solutions to address challenges.
- Proposed and implemented performance optimizations and scaling strategies for improved efficiency.
- Worked with a cross-functional and self-organizing team to design and deploy iteratively in an Agile environment.
- Conducted code reviews to ensure adherence to clean code standards.

- Increased code coverage by writing test cases, ensuring the highest quality of code.
- Developed the new version of the Platform for trainers, members, and club owners.
- Designed the API for the mobile app, focusing on activity tracking and home workouts.
- Collaborated with various frontend teams (Web, Mobile, Station) for seamless integration.
- Assisted BI and Data Science teams in integrating smart features into the Platform.

Skolera

Lead Backend Engineer

June 2018 - July 2019 (1 year 2 months)

Egypt

- Conducted technology research and engineered comprehensive solutions to address various challenges.
- Proposed and implemented performance optimizations and scaling strategies for enhanced system efficiency.
- Contributed to the continuous improvement of the Skolera system.
- Collaborated with a cross-functional and self-organizing team, participating in the design and iterative deployments within an Agile environment.
- Conducted code reviews to ensure adherence to clean code standards.
- Increased code coverage by writing test cases, ensuring the highest quality of code.
- Developed APIs and web services used by front-end applications (web and mobile).
- Contributed to the development of the front-end web using Angular.

Carriage Co

Senior Software Engineer - Backend

November 2017 - June 2018 (8 months)

Egypt

- Worked with a leading on-demand delivery company in the Middle East, Carriage got acquired by Delivery Hero.
- Responsible for building internal tools, including operations and customer service software.
- Optimized driver algorithms and consumer-facing e-commerce applications.
- Developed the large-scale project trycarriage.com using Ruby On Rails.
- Worked on performance enhancements for the trycarriage.com project.

- Built both back-end and front-end pages for various applications.
- Developed APIs and web services used by front-end applications (web and mobile).
- Contributed to the development of the front-end web using Angular.

USY TECH

Senior Backend Engineer

January 2014 - November 2017 (3 years 11 months)

cairo

- Developed large-scale projects reyada.com and akhbarak.net using Ruby On Rails and Angular.
- Worked on performance enhancements for both websites to ensure optimal user experience.
- Collaborated with team members to deliver web solutions with a high level of quality.
- Engaged in effective communication with clients, understanding and addressing their requirements.
- Assisted junior resources, facilitating their learning and integration into the team.
- Conducted investigation of new paradigms and technologies, assessing their relevance.
- Shared acquired knowledge with team members to foster a collaborative learning environment.
- Participated in brainstorming and planning sessions, cooperating with the team to address challenges.
- Developed APIs and web services using JSON to facilitate seamless data exchange.

elCinema.com

Software Engineer - Backend

June 2013 - May 2014 (1 year)

cairo

- Developed the online website elcinema.com, including its online booking system for cinemas.
- Implemented elcinema.com version 1 using the Codeigniter PHP framework.
- Upgraded to elcinema.com version 2, built on the Ruby On Rails framework.
- Worked on performance improving for the web and APIs.

cubeadv.com

Full-stack Developer

August 2011 - July 2013 (2 years)

- Developed software UI using HTML5, CSS, JS, and jQuery.
- Utilized Ruby on Rails or Codeigniter frameworks to build the backend of the application.
- Implemented both front-end and back-end components for comprehensive software solutions.
- Built APIs and WebServices, supporting JSON and XML formats for seamless data exchange.

Education

faculty of engineering mansoura

Bachelor's degree, Computer Software Engineering · (2005 - 2011)
