Osama Amer

Front-End Developer | JavaScript | TypeScript | Vue.js | Nuxt.js |
React.js | Next.js | HTML5 | CSS3 | GitHub/Git
Muscat, Masqat, Oman

Summary

Front-End Developer with +3 years of experience building high-performance, responsive web applications. Strong understanding of JavaScript core concepts and TypeScript, along with expertise in React.js, Vue.js, Next.js, and Nuxt.js, with additional familiarity in Angular. Skilled in state management (Jotai, Pinia) and modern tooling. Experienced in developing Real Estate SaaS and ERP systems, dashboards, and admin panels. Passionate about clean code, accessibility, and performance optimization, with proven ability to deliver scalable solutions in Agile/Scrum environments.

Possesses a foundational understanding of back-end development concepts, including REST APIs, GraphQL, authentication, and database integration, enabling better collaboration with full-stack and back-end teams.

Experience

First Code

Front-End Web Developer
April 2025 - Present (1 year 1 month)
Riyadh, Saudi Arabia

Developed the front-end architecture of a modern Real Estate SaaS platform for real estate developers in Saudi Arabia. Focused on performance optimization, scalability, maintainability, and delivering intuitive user experiences (UX). Built robust, multilingual (LTR/RTL) applications.

Key Contributions & Achievements:

Delivered core SaaS modules for property management, contractor workflows, and investment tracking using React.js with TypeScript.

Architected state management with Jotai, enabling atomic, reactive updates and reducing app-wide re-renders by 30%.

Optimized data fetching and caching using React Query, improving API response handling and reducing load times.

Implemented multilingual and RTL-ready interfaces with Next-Intl, supporting seamless Arabic and English localization.

Designed and validated complex, dynamic forms using React Hook Form integrated with Ant Design components

Integrated REST APIs via Axios, ensuring secure and efficient client-server communication.

Cloud AI Solutions

Web Software Engineer

December 2023 - April 2025 (1 year 5 months)

Ontario, Canada

Building modern web applications and optimizing scalable, high-performance applications with intuitive user experiences. Leveraging Nuxt3.js and modern JavaScript practices, I spearheaded the migration of a legacy web app from Nuxt 2 to Nuxt 3, enhancing performance, developer workflows, and maintainability. My work integrates Pinia for robust state management and Jest for comprehensive unit testing, ensuring reliability across mission-critical systems.

Key Contributions & Achievements:

Led the migration of a web app from Nuxt 2 to Nuxt 3, improving performance and code maintainability.

Develop responsive, multilingual interfaces with SASS, i18n, and HTML5.

Implement unit testing (Jest) to ensure reliable, bug-free code.

Manage state efficiently with Pinia and integrate APIs using Axios.

ezexpo

Software Engineer

December 2024 - February 2025 (3 months)

Riyadh, Saudi Arabia

NAMAA SOLUTIONS - نماء للحلول البرمجية

1 year

Frontend Developer

May 2023 - December 2023 (8 months)

Istanbul, Turkey

After demonstrating my technical growth during internships, I transitioned to a full-time role where I took ownership of end-to-end feature development for high-performance web applications. Leveraging Nuxt3.js and Vue.js, I built complex interfaces with libraries like Vuetify, vue-select, and Leaflet.js for interactive maps. I optimized web performance using Tailwind CSS and Bootstrap-vue, while tools like ApexCharts and Swiper enriched data visualization and user interactivity.

Working in a Scrum-driven environment, I collaborated with cross-functional teams to deliver responsive, accessible solutions. I implemented i18n for global audiences, validated forms with vee-validate, and streamlined API interactions using Axios. My focus on web performance and responsive design ensured seamless experiences across devices.

Key Achievements:

- Led migration to Nuxt3.js, improving app performance and developer experience.
- Integrated Scrum methodologies to enhance team productivity and iterative delivery.
- Mastered advanced tools (Vue Form Wizard, vue-the-mask) to solve niche UX challenges.

Frontend Developer

January 2023 - May 2023 (5 months)

Istanbul, Turkey

Building on my foundational internship experience, I joined a new team to deepen my expertise in modern frontend development. During this internship, I focused on building scalable, multilingual web applications using Vue.js and Nuxt.js, integrating tools like i18n for localization and AOS for smooth animations. Collaborating closely with designers and backend developers, I contributed to refining UI components with Bootstrap and SASS, ensuring pixel-perfect responsiveness.

I further strengthened my workflow with Git/GitHub for version control and adopted best practices for clean, maintainable code. This role allowed me to explore advanced Vue.js patterns and solidify my understanding of component-based architecture, preparing me for the transition to a full-time position.

Key Contributions:

- Developed dynamic, SEO-friendly interfaces with Nuxt.js and Vue.js.
- Enhanced user experience through animations (AOS) and modular CSS (SASS).
- Supported Agile workflows to deliver features aligned with stakeholder requirements.

TalentVar

Frontend Developer

October 2022 - February 2023 (5 months)

Istanbul, Turkey

As my first step into the world of frontend development, my internship at TalentVar provided a dynamic foundation for honing my technical skills and embracing real-world challenges. During this 5-month role, I collaborated with cross-functional teams to build responsive, user-centric web interfaces using HTML, CSS, and JavaScript while leveraging modern frameworks like Vue.js and jQuery. I gained hands-on experience implementing Bootstrap for streamlined design workflows and utilized JSON for efficient data handling.

Working in an Agile environment, I contributed to projects from concept to deployment, ensuring code quality through GitHub version control and iterative feedback. This internship not only strengthened my technical expertise but also taught me the importance of adaptability, teamwork, and attention to detail in delivering impactful solutions.

Key Skills Developed:

Frontend Development (HTML5, CSS3, JavaScript)

Modern Frameworks/Libraries (Vue.js, jQuery, Bootstrap)

Version Control (GitHub)

Agile Project Execution

Responsive Design & Cross-Browser Compatibility

This experience solidified my passion for creating seamless digital experiences and equipped me with the confidence to tackle complex frontend challenges. Eager to continue growing as a developer while contributing to innovative projects!

Freelance

Web Developer

October 2021 - October 2022 (1 year 1 month)

Building custom websites and web applications for clients across industries. Focused on delivering clean, responsive, and user-friendly solutions tailored to business needs.

Key Highlights:

- Develop dynamic websites using JavaScript, HTML5, CSS, Wordpress and modern frameworks.
- Collaborate directly with clients to translate ideas into functional, visually appealing designs.
- Optimize sites for speed, accessibility, and cross-browser compatibility.
- Manage projects end-to-end, from concept to deployment and maintenance.
