Islam Sayed

Senior Front-end Engineer
Cairo, Egypt

Summary

With over five years of experience as a software engineer, I am passionate about designing and developing web applications that are secure, scalable, and user-friendly. I have a Nanodegree in Front End Web Development from Udacity, and I am proficient in a variety of software development tools and technologies, such as Next.js, React, HTML, CSS, JavaScript, and more.

Currently, I work as a software engineer at MLSecured, a leading company in the field of AI Governance, Risk, and Compliance. There, I spearhead the end-to-end design and development of enterprise-grade web applications, employing a robust stack of front end technologies to create modular, reusable, and visually appealing user interfaces. I also design and implement advanced data visualization tools and dashboards, enabling stakeholders to glean actionable insights from complex datasets with ease. Additionally, I continuously analyze and optimize application performance, ensuring lightning-fast load times and a smooth, lag-free user experience across all devices.

Besides my professional work, I also enjoy creating and sharing web development tutorials on various platforms, such as Medium and Dev.to. I aim to teach problem-solving skills and best practices to aspiring and novice web developers, as well as to showcase my own projects and expertise. I have published multiple articles on topics such as accessibility, variable initialization, and event listeners in JavaScript. Furthermore, I hold several certifications from Udacity and LinkedIn, demonstrating my commitment to lifelong learning and professional development.

Experience

iHorizons
Senior Frontend Engineer @Ooredoo Qatar
June 2024 - Present (1 year 11 months)

Qatar

At iHorizons, I have contributed extensively to the development of several flagship web applications for Qatar, delivering high-quality, responsive, and performant user experiences aligned with Ooredoo's brand and business goals. These projects serve thousands of users and are integral to Ooredoo's digital strategy.

Key Projects & Contributions (for Ooredoo):

Ooredoo Qatar B2B Portal:

Enhanced Ooredoo's business portal by implementing advanced dashboards, voucher redemption workflows, and efficient multi-step forms. Improved maintainability and user experience through reusable components and optimized frontend architecture.

Hala Digital Progressive Web App (PWA):

Delivered a robust and responsive PWA featuring OTP login, guest and registered flows, offline support, and real-time updates. Optimized service workers, caching strategies, and connectivity detection for reliability under all conditions.

Technical Highlights:

- Delivered secure onboarding flows, language switchers, dashboards, and authentication mechanisms using React, TypeScript, Redux Toolkit, RTK Query, Clerk, React Hook Form, and Zod — all tailored to Ooredoo's ecosystem.
- Focused on performance and accessibility (WCAG) by leveraging modern React patterns, TailwindCSS, code splitting, and best practices.
- Implemented end-to-end (E2E) testing with Cypress, covering critical user journeys to ensure reliability and catch regressions early.
- Contributed to internal developer efficiency by creating shared hooks, utilities, and testing setups that improved team velocity and code quality.
- These contributions reflect my ability to deliver scalable, maintainable, and user-centric frontend solutions for Ooredoo's key digital products, working

collaboratively with designers, backend engineers, and stakeholders to meet ambitious goals.

Udacity

Course Instructor

April 2025 - July 2025 (4 months)

United States

- Designed and authored the “Optimize Your GitHub Profile” course for Udacity.
- A career-focused course designed to help developers present their projects and skills effectively on GitHub.
- Course Link: <https://www.udacity.com/course/optimize-your-github-profile--cd13151>

MLSecured

Software Engineer

September 2023 - June 2025 (1 year 10 months)

United States

- Design and Development: Spearhead the end-to-end design and development of enterprise-grade web applications, employing a robust stack of front end technologies to create modular, reusable, and visually appealing user interfaces.
- Data Visualization: Design and implement advanced data visualization tools and dashboards, enabling stakeholders to glean actionable insights from complex datasets with ease.
- Performance Optimization: Continuously analyze and optimize application performance, ensuring lightning-fast load times and a smooth, lag-free user experience across all devices.

Avalanchio Corporation

Software Engineer

April 2023 - October 2023 (7 months)

United States

- Design and code secure front-end applications for visualizing data in the realm of cybersecurity.
- Implement robust security measures to safeguard front-end web applications against potential threats and vulnerabilities.
- Ensure compliance with web accessibility standards to guarantee inclusivity and usability for all users, including those with disabilities.

- Optimize front-end performance to enhance user experience and streamline data visualization processes.
- Collaborate with cross-functional teams to integrate security best practices into the front-end development lifecycle.
- Stay updated on the latest trends and advancements in web security to continuously improve the security posture of front-end applications.
- Provide guidance and mentorship to junior team members on web security best practices and techniques.

Udacity

Tutor - Front End Web Development

February 2019 - September 2023 (4 years 8 months)

- Support students by providing thorough, personal and timely technical support and feedback.
- Share good resources with mentees to build their knowledge.
- Teach students updated web development technologies, best practices, and frameworks.
- Hold projects' walkthrough webinars to help students make progress with their projects.

Codehood

Tutorial Content Creator

January 2020 - March 2023 (3 years 3 months)

Cairo Governorate, Egypt

- Create web development tutorials.
- Teach problem solving skills.

Tawwr Coding School

Instructor and Curriculum Creator

February 2022 - November 2022 (10 months)

- Design detailed educational curriculum, including topics, dates and number of hours required per course.
- Explain various new technologies, and provide projects walk-through.
- Answer students' questions and providing support to help them building knowledge.
- Provide feedback to students that will enhance their performance.

Education

Udacity

Nanodegree, Front End Web Development · (2017 - 2018)

Ain Shams University

Bachelor of pharmaceutical Science · (2001 - 2006)
